Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 16-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.
2. Claims 8, 9 and 11-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 12.

The traverse fails because applicant failed to state that the species are not patently distinct.

3. Claims 1-4, 6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pritchard et al in view of Boyer et al or Finkowski et al or Gazzarini.

It would have been obvious to step the discharge ends of channels 456A of unit 400 in Pritchard et al as taught by the discharge ends of channels 30 of Boyer et al, discharge ends of conveyors 14 and 16 of Finkowski et al or discharge ends of surfaces 15 of Gazzarini. The unblocked and stepped discharge ends permit spacing change (laterally or longitudinally) between laterally adjacent articles on the receiving conveyor dependent on the angular position of the upstream channeled chute and the downstream receiving conveyor. With regard to claim 3, note aligning projections 470 of Pritchard et al. With regard to claim 6, the need for removability of the projections is immaterial to the operation of the system since no proof of criticality has been given.

With regard to claim 10, the relationship of the distance between troughs to the distance between discharge planes has not been proven to be critical to the operation of the claimed structure.

4. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pritchard et al in view of Boyer et al or Finkowski et al or Gazzarini and Gebhart or Spain.

It would have been obvious to add the teachings of aligning projections (arrayed and non-arrayed and cylindrical) 20 of Gebhart or 19 of Spain to projections 470 of Pritchard et al in the structure of paragraph 3.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
